

### Kronos | Zefiro Granduca | Livingstone

# dynamism, style, dynamism, style, e safety.

Roller Team is a company gaining an ever greater following, also at an international level, and one of the most significant production models in the European motorcaravan industry.

Established on the foundations of know-how from a historic company on the motorcaravan scene, Roller Team can offer competitive products both in terms of price and equipment, which are at the cutting edge thanks to the excellent construction techniques adopted.

### Roller Team, close to the customer everywhere with excellent service.

There are hundreds of qualified outlets that distribute the Roller Team brand today: a comprehensive sales network spread throughout the major European countries. It's thanks to its distribution partners that Roller Team is close to its clientele everywhere, ready to satisfy customers' every requirement with appropriate tools and a wide range of pre-sale and aftersales services. An organised, targeted network, product development in keeping with the habits and needs of different cultures, distribution agencies in the area, staff from the area: these are the secret weapons with which Roller Team presents itself on international markets with growing success.

# the choice of value and reliability

One of the main advantages

of choosing a big name is the certainty of the best product quality permitted today by technology, materials and a complex industrial process.

That's the reason for choosing **Roller Team**, which works day after day to improve its products and services, making quality its priority so that the price of the product is reflected in its genuine value.

Roller Team: the certainties.

REDUCTION TECHNOLOG

00

ROLLEN TEAM

0

#### More insulation, more protection, less noise.

The technology for building living guarters capable of ensuring complete protection for your motorcaravan. Noise Reduction System is here, the study to reduce noise inside the vehicle when driving.

The motorcaravan that "breathes" thanks to correct internal air distribution, favouring circulation, making the temperature uniform and preventing condensation from forming.

The Italian with "Nordic" features. Always at ease in the vehicle, whatever the temperature outside: a motorcaravan designed and built for use in colder climes.

Spaces for your world and your relationships designed for everyday needs and to promote maximum practicality and usability.

300 Kg 300 of independence. A garage locker designed for you to take your freedom with you anywhere at all times.

### Jnder. Contro

In safe hands with motorcaravan "UnderControl". Roller Team puts its own experience and expertise at the service of every motorcaravan produced. A team dedicated to quality control and continuous improvements follows each motorcaravan throughout the production stage with inspections and tests from design to delivery.

### The Roller Team world is just a click away!

Go to **www.rollerteam.it** for comprehensive product details, photographs and retail network. All news in real time, special activities, special offers and much more. Connect from your PC, tablet or smartphone and discover the ROLLER TEAM web world!

### more insulation more protection less noise

ExPS EVO TECNOLOGY:

the technology capable of ensuring complete protection for your motorcaravan in terms of:

Greater thermal and acoustic insulation over time with all wood-free wall structure.

**Greater protection from the elements** resulting from the use of strong, resistant materials to guarantee a long life.

Greater structural resistance: the materials are not influenced by humidity, heat or impacts, such as hail.

Total insulation in contact zone with the outside using materials with high insulating performance such as peripheral plastic extrusion or internal waterproof PS.

#### Maximum shock resistance,

easy repairs and easy maintenance.

With Extreme Protection System EVO, 6 years' peace of mind!

#### Floor

Lower and upper fiberglass covering for enhanced protection, thermal insulation and resistance. The fibreglass undercarriage ensures the best protection from external erosion and wear, securing protection from gravel, stones, road salt and humidity. Floor in waterproof PS loor thickness 54 mm, utmost resistance to shocks. Perimetral protection in extruded plastic, is strong to allow more payload, prevent thermal bridges and avoid water absorption. Internal ceiling in pvc. 0

#### Roof

Anti hail roof in fiberglass. Internal roof in fiberglass. Extruded plastic inserts in areas in contact with the outside. The use of these materials prevents the formation of heat bridges inside the living pod which may cause condensation or loss of heat. Roof thickness with waterproof PS or a greater insulation and protection. Wood free.

#### ROOF THICKNESS 31mm

ANTI HAIL ROOF IN FIBERGLASS WATERPROOF PS INTERNAL WALLS IN FIBERGLASS EXTRUDED PLASTIC

WATERPROOF PS ANTI HAIL ROOF IN FIBERGLASS HIGH DENSITY EXTRUDED PLASTIC INTERNAL WALLS IN FIBERGLASS

WALLS THICKNESS 31mm

INTERNAL CEILING IN PVC WATERPROOF PS INTERNAL WALLS IN FIBERGLASS WATERPROOF PS EXTERNAL FLOOR IN FIBERGLASS

FLOOR THICKNESS 54mm

#### Walls

#### Anti hail walls in fiberglass.

Waterproof PS in all walls: no water is absorbed to limit infiltrations inside the vehicle. Wood free.
High density extruded plastic: it prevents any contact of the inner part of the walls with the water.
Internal walls made of humidity-resistant fibreglass without heat bridges which may cause condensation or loss of heat.

#### Noise Reduction Technology

The furniture features protection with soft material for furniture–outer body connection. A plastic spacer separates the lower floor from the chassis rail. Roller Team proposes a new assembly system for internal components ensuring greater comfort when travelling thanks to **better build quality**.

# breathe made to breathe

By study of interior climate and air circulation Roller Team offers a motorcaravan that "breathes".

The Breathe project promotes the study of air distribution inside a motorcaravan promoting circulation, rendering the temperature and avoiding the formation of condensation.

Because a motorhome must be <u>well-insulated</u> <u>from the outside</u> but also <u>well-ventilated inside</u>. MADE TO BREATHE BREATHE UNIT UNIT UNIT

Permanent ventilation inside wall units. The units are installed leaving a gap between them and the motorhome wall to promote uniform air distribution avoiding the formation of condensation or mould.

0—

A special opening ensures the **free circulation** of air inside the units. Anti-condensation distanced from the wall itself in the day zone and in the night zone to allow the circulation of air and heat. Mattresses of the rear beds in **polyester fabric** quilted top and sides. With breathable technical fabric in the bottom part (except overcab and elevating bed models)

#### Perimeter heating in all models with rear twin beds or rear fixed double bed.

The **slatted frames** of all fixed rear beds and the drop-down bed promotes the flow of air between frame and mattress.

### the italian with a nordic disposition

Designed for distribution From Northern Europe to Southern Italy, every Roller Team vehicle uses technologies and materials that ensure high performance and a perfect climate. So you're always at ease in your vehicle, whatever the temperature outside, Roller Team offers the technology you need... when you need it!

#### Winter holiday included

Enhance your comfort on board still further with original accessories:

 Heated windscreen (motorhome). Diesel, gas or electric boosted heaten Electronically heated floor.

STLLL

ROLLER TEAM

#### Available in the Touring Pack:

Insulated tank. Insulated step. Insulated pipe.

Thumbs up from our northern customers: Roller Team is one of them!

A motorcaravan designed and built for use in the coldest climates: the construction techniques it takes, high-performance materials in terms of insulation and protection from the elements and specific equipment that's also been tested in the climate chamber.

rear garage locker.

The specifications contained herein may refer to only certain models of the range.

### 

The Alde heating system features a liquid heat-transfer

medium which is heated by a gas boiler.

According to the same principle that characterises domestic systems, the Alde heating system features a liquid heat-transfer medium which is heated by a gas boiler. A pump circulates the heated liquid in a circuit of interconnected radiators. The radiators heat the air, which is distributed evenly within the motorhome through slits on the wall units. Once the air has cooled, it descends and, passing through slits in the floor, can heat up again and become warm within the circuit.

Let's look at the advantages of heating with a liquid heat-transfer medium.

- Healthy atmosphere free from suspended dust and feeling of dryness
- Even and longer-lasting warmth.
- **Low noise** and lack of ventilation.
- Continuous production of hot water.

driving seats.

- Hot water

pipes under the

Heated towel

rail in toilet:

genuine wall heating.

Alde system along the entire perimeter of the motorhome for constant warmth.

Available for some models of the Kronos and Zefiro range, ask to your dealer.

#### Easy to load.

Double door for accessing the locker, passenger side and driver side. Through load compartment which can be accessed from both sides. Doors that open to 180 degrees: extremely simple loading access. Wide passage, among the largest in its category (Kronos range).

#### So flexible it bends to your requirements.

Where do you want more space? Adjust the volume of the garage to load more... or have a bigger room!

up-and-down bed system for flexible spaces and loads.

#### You need space, but hidden spaces too!

- Opening stowage locker in side band.
- Storage space in floor.

# 290 M True sportiness

#### As great as your passion!

A ROLLER TEAM exclusive.

Whatever your sport choose to live it to the full with the Kronos 290 M and Zefiro 290 M: new and exclusive models that allow you to devote yourself fully to your passion while always having all the comforts with you. Maxi-garage for motorcycles, bicycles, quads, karts, mobile workshop, tool shed but also shop or laboratory. All this without taking away anything essential to the use of your leisure time: Kronos 290 M and Zefiro 290 M are in fact multi-functional, because the particular design of the rear area does not affect the living uses.

The specifications contained herein may refer to only certain models of the range.

Floor with removable rubber protection.

Enjoy the motorhome made to measure for your needs. The only one equipped so you can live your dream of being born for sports!

Provision of wall with aluminium bars for attaching custom equipment.

#### Internal LED lighting.

Internal space and surfaces for equipment (compressors, tool drawers, etc.).

Two wardrobes for storing sports gear, one of which removable.

Washable surface with extractable

### spaces to experience to the full...

Spaces for your world and your relationships.

Spaces designed by expert hands in a continuous exchange of usability, necessity and

practicality.

Roller Team, a well-made motorcaravan able to guarantee:

- paces to experience to the full.
- Room for everything
- High-performance materials suited to everyday use.

The specifications contained herein may refer to only certain models of the range

Floor on a single level, without steps.

USB ports in the day zone to recharge smartphones and tablets, right where you need them the most.

Doors for your privacy, separating the living area from the sleeping area.

Low entrance to get in and out of the motorhome easily.

Internal height of more than 2 metres.

Uniform interior heating through hot air vents with particular focus on the critical, exposed areas of the living pod, like the driving cab, the rear garage, the night zone and the overcab area.

0

#### Folding table for an adaptable space:

the perfect solutions to join the need to contain dimensions to clear room for your everyday activities. 360° adjustable one-leg island table for more freedom of movement.

LED lighting : better lighting performance and energy saving -more energyefficiency, more autonomy, longer battery life. Pleasant and uniform indirect lighting through light strips and frames; LED spot lights for reading without annoying your travel mates and for more direct light; courtesy lights on the floor to find your way at night.

### ... and safety

Central locking remote control for cell entrance door and driver's cab doors (standard on Granduca, optional on Kronos and Zefiro).

Rear view camera on Kronos and Granduca.

Double-eyed rear view camera with parking function and travel function to view traffic on Zefiro.

Also, standard presettings which ensure, in the after-sales service at the dealer, an easy and safe assembly of accessories, without tampering with the structure of the motorhome itself or the internal systems.

# **spaces for your world and your relationships**

### Flexible, practical use, like the kitchen at home.

Like all other environments, the kitchen of a motorhome must comply with specific needs firstly that of allowing freedom of movement and the practicality of perfectly managed spaces.

Roller Team kitchens in addition to being welcoming combine ergonomic and practicality by implementing solutions which:

- minimise movements inside.
- facilitate everyday cooking, washing and cleaning activities.
- optimise the available space, integral generous storage areas.

The specifications contained herein may refer to only certain models of the range

S.

Home-inspired equipment. Three-hob cooktop with adjustable electric lighting. Glass cover to extend the work top surface when the cooktop is not in use. Possibility of optional oven.

The kitchen is the environment of the motorhome that must be subjected to continuous stresses due to use, heat and time: we therefore need high-performance materials,

robust and large work surfaces, quality household appliances, furniture and durable wall cabinets, wide spaces for stowage.

#### Resistant to scratches

and knocks, Long-lasting with scrubbing, Easy to clean, Antibacterial.

"Social Kitchen": 2350 mm of exterior length for **more living space inside!** A wide passage that allows cooking, passing, stopping... all together! (except Granduca range). A space where the pleasure of cooking is naturally associated with the pleasure of relationship.

**Refrigerators** up to 150 I with freezer, or 140 I slim fridge for for more living spaxe inside with froster and bottle compartment, **with automatic energy-saving switch** 220 V, 12 v or gas (according to the models).

### in the kitchen everything to hand and space for everything

Deep drawers and bins with soft-close and automatic locking function: more room, better access and improved tidiness with respect to furniture within swing doors.

Lower gas cylinder compartment to avoid using up valuable kitchen space. The lower position also makes replacing gas cylinders easier.

High wall cabinets for ample

storage space.

Pull-out sliding baskets with chrome metal edges.

Modular equipped wall on the Zefiro range

L-shaped kitchen More freedom of movement and action in a more compact space: washing up, cooking and preparing food is easy. A pleasant zone with cooktop, refrigerator, work tops and storage all within arm's reach

#### The large work top can be extended with a sink cover and glass cooktop cover. Enough room for remarkably capacious refrigerators.

Storage in large extractable bins and deep drawers, often combined with storage columns that can be pulled out entirely.

> Longitudinal kitchen Available in two versions - maxi or compact: all functions along a single wall.

**Extendible work top** in a few simple steps courtesy of folding additional surfaces.

Plenty of freedom of movement in the corridor, brighter and better ventilation because the window is particularly large.

The specifications contained herein may refer to only certain models of the range

# in the bed sleep well sleep long

Here are our rules for getting up on the right side of bed.

Bottom of mattresses made of technical, quilted breathable fabric. Top and sides made of quilted polyester.

Slatted bases for all fixed rear beds.

in the night zone. Skylight over the bed for more air and to stargaze.

Side windows

#### Audio diffusion

in the sleeping area by means of **two speakers** in the bedroom.

LED night-time courtesy lights in the floor. LED spot lights under the units for more direct light for reading books without

The specifications contained herein may refer to only certain models of the range

### Central bed

A real bedroom with nautical-style double bed, truly excellent dimensions up to 150 cm wide and 190 cm long, with adjustable backrest. on some models. Complete with two bedside tables on the right and left sides for books, drinks and accessories, with two wardrobes on top.

Easy access from both sides using steps which double as storage compartments with easy access to the foot of the bed, the bed frame can

**be lifted** to access the storage space under the bed.

Maximum privacy guaranteed by sliding doors which separate the day area from the night area, paired with toilet and shown cubicles, usually separate in two different environments.

More flexible access to bed or garage loading areas with Flex Space the up-and-down bed system.

### Transverse bunk beds

Very good size beds, great flexibility with the lower bed that can be lifted giving space and access to the garage. Exclusive Roller Team models, Kronos and Zefiro 277 M, 7 approved seats and 7 beds, a maxi dinette opposite face to face. Kronos and Zefiro 279 M with double bunk bed for 4 people: with a second double bed that can be lifted to choose between 4 fixed double beds at the back or stowage space when a bed is not in use.

### Twin beds

Two generously sized, single bed arranged longitudinally, easy access to beds with large steps which can also be used for storage, provided with work top in the middle and units. Wardrobes under the bed with access from front doors or from the top using a pull-out frame lifting system. Additional cushions with standard wooden extensions to **turn the single beds into a crosswise comfortable double bed.** 

Peripheral heating using specific vents on the side walls of the beds.

### Rear bed with garage

Excellent use of space with the bed perfectly integrated in the entire width of the vehicle over the garage. Wardrobe positioned by the side of the bed. Storage is maximised by generous units on the wall over of the three sides of the bed. Access to the bed is guaranteed by an integrated or extractable ladder at the feet of the bed. Peripheral heating using specific vents on the side walls of the beds. More flexible access to bed or garage loading areas with Flex

**Space** the up-and-down bed system.

# Bed transformable into dinette

For the most eagerly awaited or unexpected guest! The dinette turns into an extra bed.

Easy to transform: simple move the table down and insert the cushion. The extra bed is ready.

### Overcab

A double bed always ready, plenty of room for sleeping, plenty of room for storage large objects during the day, plenty of usable room with

being 700 mm high in the middle can be lifted to gain easy access into the cab. Ventilation, light and heating are guaranteed by appropriately arranged windows and vents.

#### Electric folding bed Plenty of living space and minimum dimensions

**during the day,** when it is closed against the roof, **comfortable and practical,** simply by lowering the bed using the electrical system, **at night,** single or double according to the model, in some cases even **maxi - 136 cm wide,** can be stopped at any height, **the dinette and the kitchen can be used** even when the bed is down.

### a corner dedicated to yourself

The toilet is a pleasant place designed for your wellbeing and not just a simple facility, Roller Team puts the focus on functionality and ergonomics.

All-wood furniture. Generous furniture with mirror so you need to give nothing up. Light integrated in the mirror. 230 V socket for hair-dryer or electric shaver. Towel rack. Wash basin with mixer tap to adjust water temperature a flow. Ventilation and light are guaranteed by mirrors and even a fan in the roof. A bar in the shower cubicle on some models is perfect for drying sports gear and hanging long garments. Sufficiently roomy shower, height up to 1910 mm (mod. Kronos 265 TL), with storage shelves, mixer tap and removal shower head.

> Double drain in floor the water flows out faster even when the motorhome is not parked perfectly flat.

The specifications contained herein may refer to only certain models of the range.

### Central linear toilet

available on models with crosswise bed, bunk beds. over or under 7 metres. This type of toilet provides the most freedom of movement and high comfort. The shower is separated from the toilet by a rigid door with storage shelves. The toilet furniture is made of wood and has generous storage room for accessories. This solution generally offers large mirrors and good lighting and ventilation.

### Independent toilet and shower

Versatility is the keyword of this living solution because the space can be optimised to guarantee remarkable freedom of movement inside the motorhome. The advantages: separate and simultaneous use of the two environments, more passage space towards the night zone which can be used as locker room, maximum privacy guaranteed by the separation door.

And the second second

### Compact linear toilet

The perfect trade-off offering a high level of comfort on more compact models in which the living area is maximised. A world-class outfit in terms of room and functionality: the shower is separated by a folding rigid door and the units are adequately capacious.

### van livingstone the choice of value and reliability

For more than 10 years, Roller Team has specialised in campervans, which are built in the factory in Paglieta (Abruzzo), an industrial centre of more than 28,000 m<sup>2</sup> which produces vans for all Europe for the Trigano group.

An established brand on the motorcaravan scene, today Roller Team also specialises in the production of outfitted vans.

ROLLER TEAM

### + insulation, + protection,

The technology for interior insulation capable of ensuring complete protection for your campervan.

#### In safe hands with motorcaravan "UnderControl".

Roller Team puts its own experience and expertise at the service of every van produced. A team dedicated to quality control and continuous improvements follows each motorcaravan throughout the production stage with inspections and tests from design to delivery.

Ok, today let's do it like this: single environment, multiple space All the space is designed with a view to maximum functionality, modularity and ease of use.

#### Campervan in the winter? Sure!

Those who say a campervan isn't right for winter holidays never tried a Livingstone. Roller Team campervans dispel this myth and offer everything you need for a problem-free holiday in cold climates.

# + insulation + protection - noise

ExPS Evo, the **exclusive** technology for insulating the interior of the campervan from outside temperatures and noises ensures better heat and acoustic insulation also thanks to the absence of thermal bridges with the outside.

#### Noise tests

-

•

relating to external agents (test carried out with calibrated sound meter and certified by the SIT centre) have also demonstrated that the noise perceived inside the campervan in the event of rain is lower than 37% in the dinette area and -30% in the rear area.

With Extreme Protection System EVO 6-year guarantee against infiltration!

#### Materials with excellent **performance** and appropriate

construction solutions ensure that the Livingstone campervan has excellent insulation that makes it appropriate for summer and winter use. High performance is guaranteed by the use of material with high insulation performance, polyester fibre covered with a film of aluminium, covering the internal walls, ceiling, crossmembers, pillars and rear doors: Total coverage. The flexibility of the material allows it to be inserted in cavities as well. Absence of thermal bridges. Uniform coverage to promote constant internal temperatures.

# campervan in the winter? Sure!

### Want even more?

Choose between the two additional equipments that enhances on-board comfort still further in the event of the coldest conditions, proving the product best suited to those who prefer certain colder destinations.

#### Winter Pack:

- Grey water tank insulated with a 15 mm layer of polyurethane.
- Electrical probe with thermostat positioned close to drain valve.
- Insulation of external water pipes.
- Insulation of external heating pipes.

#### Arctic Pack:

- C6 combigas boosted heater
- Thermal blind to protect side windows.
- Thermal blind to protect dashboard.
- Insulated rear curtain.

Exclusive equipment tested in the climate chamber: Livingstone equipped with Arctic Pack reached the target of the standard in 95 minutes!

Those who say a campervan isn't right for winter holidays never tried a Livingstone. Roller Team campervans dispel this myth and offer everything you need for a problem-free holiday in cold climates.

### Same performance as a motorcaravan!

#### Roller Team has tested its campervans in the climate chamber,

basing itself on the EN 1646-1 standard, according to which a vehicle brought to -15° must, once the heating systems have been activated, reach an internal temperature of 20° in 4 hours. Livingstone, in its basic configuration, fully satisfied the target at a little over 3 and a half hours, thus earning "grade 3" performance. The result is comparable to the performance of a medium motorhome (with length of 7.4 metres and rear central bed) which, with an internal volume double the campervan but very different build, bodywork and materials, reaches the target in the same time. This is all possible thanks to ExPS Evo technology, which makes Livingstone a van suited to winter use.

### SunRoof panoramic roof

Crystal sun roof

÷

### Test in climatic chambern

- Test in climatic chamber from -15°C to 40°C.
- Thermal irradiation test on the surface of the Sky Roof at 65°C; 75°C; 80°C; 85°C.
- Low temperature test (Freezing test -15°C) for control of possible formation of ice in the perimeter of the glass and any damage or malfunction.
- Vibration test with simulation of 820 km on a special route (cobblestones).
- Infiltration test carried out during the tests at low temperatures and vibration.
- Visual check to identify any damage or deformations in the surfaces of the Sky roof.

Vehicle in climate chambe

Optional in basic and Advance version

### Sun roof panoramic roof.

- Sun roof panoramic roof with external frame in black methacrylate and internal glazing in laminated glass with sun-proof silk-screen printing perimeter.
- Increased strength, gloss and durability over time.
- n the basic version comfort and practicality thanks to the storage pockets and the glass holder.

# ok, today let's do it like this!

Single environment, multiple space.

The form, furnishings and design choices guarantee great living volume. All the space is designed with a view to maximum functionality, modularity and ease of use.

Livingstone DUO:

6 winning combinations! The only motorvan that adapts its layout to your loading requirements.

- Lift-up bed bases.
- Three cupboards that can be removed separately.
- Removable, adjustable-volume double floor.
- Extra load, without taking up space

### optimized interior space

#### Home-inspired kitchen

where everything is within arm's reach:

ergonomics and functionality are the keywords Plenty of room for storage with three deep and stable bins, of which two can be completely extracted with soft-close function. The work top can be extracted easily and forms a level surface without steps. The refrigerators ensure autonomous operation by running on gas, 12 V or 230 W. Shoulder-height refrigerator column by the side of the kitchen to ensure optimal exploitation of the room underneath to make room for a large wardrobe.

**USB ports** in the day and night zone to recharge smartphones and tablets, right where you need them the most.

#### Indirect LED lighting

for a uniform and pleasant effect. LED spot lights for reading in the night zone without annoying your travel mates and for more direct light when it is very dark outside. LED technology for better lighting performance and energy saving - energyefficiency, more autonomy, longer battery life.

68

Toilet Sliding or tipping wash basin which retracts into the wall. Handy for use only when it is needed. Extractable tap to be used also for the shower. Double drain in the floor: water flows out more easily.

Folding table with extension (Advance pack), which can be dismounted and used outside: comfort and legroom when seated, large surface during use.

Garages equipped for transporting larger items thanks to removable or lift-up beds. Under-bed storage.

Model 6: with central walk-on shower and double sliding blind to separate the areas according to use. Two removable rear lockers for greater storage, only when needed. Open the toilet door in front of the kitchen to create even more room for moving without steps.

#### Generous wardrobes with

adequate interior dimensions to contain garments on hangers and with extra inside height. On some models, wardrobe positioned in lowered position under the refrigerator with large interior size ..

> Storage compartment under the floor of the dinette.

Extra side bed, where possible, like on Model 6 or Model 2, even the largest in its category.

1.5.4

CITCIVINGSTONE DUO

## Smart solutions cleverly arranged to exploit all the possible space

- Optimised interior space: hatch in the floor, rear storage spaces, equipped garage lockers, pull-up or removable beds, storage compartments, large overhead lockers.
- There is a place for everything in the kitchen : cutlery drawer, two fully extractable bins, extendible work top, double separate cooktop covers, extendible dinette table.
- Toilet with extremely functional shower: retractable or sliding washbasins, extractable taps, double drain.
- The performance of a motorhome: materials with excellent insulating properties and ideal constructive solutions ensure excellent insulation with "Level 3" performance in climatic chamber.

The pinnacle of **excellence**, with even more equipment and design!

### Dotazioni:

- Manual climate
- Passenger airbag
- Cruise Control
- Painted bumper
- Black front grille, headlight bezel and skid plate

- Panoramic skylight
- Electric step
- Pleated blind
- Seat covers
- Wooden shower platform
- Entrance door flyscreen

### Design and style:

Kitchen with exclusive acrylic stone worktops: resistant to scratches, knocks and rubbing, easy to clean, antibacterial. Sink with cover which can be used as chopping board or shelf. Acrylic stone backing to prevent liquids from dripping behind.

No sharp edges, rounded profiles in the kitchen, on wardrobes and overhead lockers.

LED lighting, light strips under the overhead lockers to illuminate the worktops and the dinette area, under the worktop to illuminate the open bins. LED strip in the outer part of the kitchen useful when the dinette table is used outside in the evening.

**Protective methacrylate shell** on the back of the overhead locker and at the base of the kitchen block: attractive, unique and functional rain protection for when the side door is open.

Folding table. comfort and legroom when seated and on the road.

data

T

6

The masses indicated in this catalogue refer to the provisions of European Directive 2007/46/EC.

#### MASS IN RUNNING ORDER

It includes the weight of the empty base vehicle, of the driver (75 kg), 100% of the fuel (60-I tank), fresh water (tank filled with 20 I while travelling), and a gas tank for living purposes (20 kg). The mass in running order, and consequently the payload and/or certified seats may vary depending on the accessories installed.

#### PAYLOAD

This consists of the difference between the maximum technically permissible laden mass and the mass in running order. It includes elements for living purposes, the transported passengers defined by the manufacturer (driver excluded), and the personal effects.

The payload calculation is based on the following parameters: 75 kg for each passenger (driver excluded), 10 kg of baggage for each passenger and for the driver, 10 kg for each metre of length of the vehicle, plus the remaining payload, which can be used for the installation of accessories or for additional baggage. All masses and loads of the empty vehicle have a tolerance of +/- 5%, in compliance with Directive 2007/46/EC. Any optional equipment increases the mass in running order and decreases the payload. The weight of non-standard accessories is not included in the mass in running order indicated in this catalogue. Additional accessories and devices reduce the payload by a quantity equal to their weight; the incidence of the weight of the individual accessories is shown in the special column in the technical data sheets or can be requested at our dealers. In case certain accessories are installed (for example, additional elements such as coupling device or motorbike rack), the mass of these accessories will affect the payload, possibly reducing it along with the number of certified seats. Please make sure that the maximum loads on the axles and the maximum technically permissible load mass are not exceeded during the complete loading phase of the vehicle. The regulations and requirements of each country may entail changes in the characteristics of this table.

The number of certified seats may vary depending on the traffic regulations in force in each country.

Trigano S.p.A. operates with an Integrated Quality, Environment and Safety Management System. Certificate number: IS014001: 2939; OHSAS18001: 1258; IS09001: 11841

## performance and safety start here

All Roller Team models are built on chassis specifically designed to be converted into motorhomes taking into account mechanical performance and above all safety, comfort when travelling and when parked over time.

The Ford Transit Chassis is equipped with a new Ford EcoBlue 2.0 TDCi engine, delivering from 130 to 170 hp of power for better performance and lower CO2 emissions. It is Euro 6.2 compliant.

16" wheels Cruise Control

ASR anti-slip system to limit loss of wheel arip.

ESP electronic stability program for correct vehicle trim.

Standard driver and passenger airbad

ESC electronic stability control system monitors vehicle handling to help the driver stay in control.

Adjustable cab seats which can revolve by 180°, with integrated armrest and head restraint, to find the best position.

Radio with controls on steering wheel. Plenty of room for bottles. telephones, maps and guides in the cab.

### Optional equipment:

Equipaggiato con un'ampia serie di tecnologie

concepite per una guida sicura in ogni situazione.

SelectShift six-speed automatic transmission for a relaxing driving experience. Not available for 4100 kg chassis with 1000 kg limit on tow hook. Possibility with 4100 kg chassis.

### Features

- Specific frame for motorhomes with lowered centre of gravity for better access to the cell.
- Steel frame with side members and crossbars, flat and resistant, allows a perfect arrangement of the living unit.
- Extended rear track for greater road stability and interior living comfort.

Engineers on the basis of continual partnerships with manufacturers, Fiat Ducato is the perfect union of chassis and living pod. Plenty of features are provided to facilitate conversion, in addition to specific electrical system and cab designed with reinforced pillars and precut roof.

Tyres suitable for long stops and with low rolling resistance to reduce consumption.

#### The steering wheel has a typical automotive slant. It can be adjusted axially with a stroke of 50 mm.

The dashboard features bottle holders and storage compartments, both open and

Chassis lowered by 15 cm. Lower height and more stability

Headlights are positioned higher up: better light beam

width on the road and reduced possibility of damage.

### Chassis Special

- Specific for motorhomes, with high torsion strength, lower to facilitate getting in and out, light and functional. With independent wheels and anti-roll bar as standard on the front and rear axles. Chassis lowered by 15 cm. Lower height and more stability.
- Wider rear track: 1980 mm, more stability and more room for the living pod.
- Captain chairs with integrated head restraint, wide backrest, improved side containment, double armrest. On pivoting plate, in addition to being adjustable in height and inclination, they can turn by 180° and once turned they can slide forwards to move closer to the dinette.

### Many variants of Motori Turbo-Diesel Euro 6.2,

securing high torque at high rpm for speedy acceleration, fuel efficiency running and low CO2 emissions. Chassis range: 3650 kg or 4250 kg or 4400 kg.

> Radio aerial integrated in the rear-view mirrors.

### You can choose among some options :

Eco Pack St. for mechanics 160-180 hp OPT 140 hp.

- **Start&Stop system**: It helps reduce fuel consumption. It restarts automatically when the driver touches the accelerator pedal.
- Smart alternator: intelligent alternator that supplies only the necessary energy.
- Electronic fuel pump: for energy saving and high efficiency in the use of find

Automatic transmission safety and your personal driving comfort with a reduction in consumption of up to 5%.

Electronic Stability Control: Electronic system for vehicle stability. When necessary, it brakes and removes power to reduce speed. It includes:

- Roll-over mitigation reduces rolling and improves stability, even in curves.
- LCA (LoadAdaptiveControl) monitors load distribution and interacts with ESC.
- ASR (Anti Slip Regulation) to prevent wheel spin while starting.
- MSR (Motor-

SchleppmomentRegelung) prevents loss of grip in the event of abrupt downshifts.

- HBA (HvdraulicBrake Assistance) aids
- emergency braking. Hill Holder keeps the vehicle stationary during uphill starts Chassis.

Because we know that satisfying our customers depends greatly on the quality of our products.

Roller Team puts its **own** experience and expertise at the service of every motorcaravan produced and follows it throughout the production stage with inspections and tests from design to delivery that meet with European standards.

The same quality standards are demanded of suppliers: for the most strategic components, a check is carried out when the material is received and before it is used in production.

## Checks in production stage

 Test on operation of the gas pipes.

### Check on operation and correct installation of the electrical systems.

Correct installation of the hydraulic systems.

### Tests in research and development and prototyping stage

Specific testing in climate chamber to check the resistance, duration and performance of the materials selected at extremely high/ low temperatures.

Performance tests on the components used: durability of mattresses, resistance to stress, reliability and compliance with European regulations in the design of the seatbelt unit.

Gas system inspection by certified staff according to the German DVGW protocol.

100 statistical checks on a percentage of the vehicles produced: aesthetic, functional, noise and fitting tests.

Test on finished product. Electronic weighing

of 100% of vehicles

before delivery and

written weight certification

for end customer.

Waterproofing tests on 100% of the vehicles produced, before delivery.

NOTICE - All the information and photos shown herein are to be considered as merely indicative and do not constitute contractual specifications. Trigano S.p.A. reserves the right to make the technical and configuration changes considered appropriate to its vehicles and to change the equipment the vehicles are provided with at any time and with no official notice. Owing to the above, all the information concerning the specifications and equipment of every motorcaravan must be requested before purchase from the dealer, who, acting as sole point of reference, will confirm or rectify the data published herein, updating the customer on the actual features and equipment of the vehicle he/she is interested in and for which negotiations are ongoing. Trigano S.p.A. declines any liability concerning changes, including additions, and/or conversions made after the printing of this document and/or delivery of the vehicle. Weights and dimensions of vehicles and options are subject to change with a tolerance of +/- 5%, dimensions of vehicles with a tolerance of +/- 3%, according the Directive 2007/46/CE. Important note: Anything which is not included in the standard version of the vehicle, concerning both living quarters and chassis, entails an increase of the mass in running order, with the consequent reduction in the useful load up to the possible reduction in the number of certified seats in case the total weight exceeds the value of the available payload consists in the difference between the maximum permissible weight and the mass in running order, with a tolerance of 5%. Therefore, during the purchase phase it is mandatory to carefully consider the weight of any optional equipment you wish to install on the vehice. This weight is indicated in the specific item of the technical data on www.rollerteam.it. Hence, please remember that the laws in force do not allow the maximum permissible weight indicated in the specific item of the technical data on www.rollerteam.it. Hence, please the total weight eduction in the usecific

It is recommended that each user adjust the load and the number of passengers carried to the maximum technically permissible maximum mass of the vehicle. Fitting, removing or alterations carried out c/o unauthorised workshops may compromise your safety and at the same time lead to invalidation of the warranty.
