Panoramic roof	--	S
Rear-view camera	--	S
Entrance door with flyscreen	--	S
Pleated cab blind	--	S

Measures in cm except where otherwise indicated

S= standard O=optional - = not available

\*To increase the vehicle payload, when travelling it is possible to reduce the fresh water tank capacity to approx. 20 lt.

The mass in running order includes the weight of the empty base vehicle, of the driver (75 kg), 100% of the fuel (60-l tank), fresh water (tank filled with 20 l while travelling), and aluminium gas cylinders (max.15 kg) filled to 90% of their capacity, and tolerance specified in the type-approval (+/- 5%) (2007/46/EC). Anything not included in the standard version of the vehicle, both living unit and chassis, results in an increase in weight in running order with resulting decreased payload up to the possible reduction of approved seats in the case of the total weight for the available payload value. The available payloads result from the difference between maximum permissible mass and running order mass and have a tolerance of 5%. During the purchase phase it is necessary to check the weight of the options to be installed on the vehicle.
